EDUCATION

West Virginia University, Morgantown, WV
Doctor of Philosophy, Economics

Aug 2016–May 2020 (expected)

Tribhuvan University, Kathmandu, Nepal
Master of Arts, Economics
Bachelor of Arts, Economics & Sociology

2010-2012

2006–2009

RESEARCH INTERESTS

Applied Health, Regional/Public and Energy Economics, Causal machine learning and policy evaluation.

JOB MARKET PAPER

Heterogeneous Treatment Effects of Medicaid and Efficient Policies.

[Download.](#)

Synopsis: I use the Oregon Health Insurance Experiment data (random assignment of Medicaid) to estimate the heterogeneous treatment effects of Medicaid on health care use, personal finance, health, and wellbeing. I perform the cluster-robust generalized random forest – a causal machine learning approach to reveal Medicaid reform policies. These reforms prioritize Medicaid allotments to subgroups that are likely to benefit the most and can improve various outcomes variables of interest by about 4% to 10% over a random assignment baseline.
